

KBPROC® Strategic Technology Offering

TriGem Technology Ltd. is offering APEX to the market, the only pipeline industry specific software that provides integrated cost and schedule estimating functions.

APEX is a client-server system specifically designed for the pipeline industry and will support the development of detailed estimate data for the construction of major pipelines. The advanced pipeline estimating & execution planning software is purpose-built and allows for comprehensive linear construction cost & schedule modeling.

APEX Purchase Options Available:

1. purchase standalone or enterprise version for perpetual use
2. purchase limited non-exclusive copy of source code
3. purchase exclusive software ownership rights

Looking to upgrade legacy system, APEX may be the answer.

Is it time to leverage APEX on your pipeline project?
